

Fly High

Bridget St John

The world is so full of a number of things
And I think we should all be as happy as kings
So please don't be down if your day should turn sour
There are so many good things, just think of a colour You will fly
Fly high And see the many wonders that the seasons bring to you
Autumn burning red and amber, summer burning blue
And please remember all you have and not that you might lose
it isn't always easy, but it's better when you do
You will fly
Fly high I love you happy and I love you sad
I will love you through good and I will love you through bad We will fly
Fly high The world is so full of a number of things
And I think we should all be as happy as kings
So please remember all you have and and not what you might lose
It isn't always easy, but it's better when you do
You will fly
Fly high Fly
High
