

# Always

## Jericco

When she said I'd love you like no other  
And she said our love would last forever  
I was young and didn't understand then  
    What it was could beat inside of me  
    And she believed in ever after  
    In a world where all your dreams come true  
And if I had a chance I'd tell her a thousand times a day  
    That I still need you I can hear you  
    Chorus:  
        Say you'll always love me  
        And be the one to understand  
        Take my life and never leave me  
And just remember that I'm always near you - always there  
    We used to live and laugh about tomorrow  
    Running out of precious time we borrow  
And there was you and love was all you wanted  
    In your heart you'll find where we belong

    And she was always there beside me  
    Reaching out and holding me tonight  
If I had a chance I'd tell her a thousand times a day  
    That I still need you I can hear you  
    Chorus  
        After love has come and gone  
        You wonder what remains  
        And you will you have the strength to let  
        Your feelings show again  
        It's never easy but I tell you  
        A thousand times a day  
    That I still need you I can hear you  
    Chorus(
