Beauty Meat

Sun Club

It's the weathers fault your friends are lost,
you looked at it,
saw you had nothing to do with it.
It's the weathers fault that you are hurt,
so insecure
but maybe it's not your fault.
No not at all.And when the weathers cold it brings us down
we say it sucks
but it just makes us all artists.
When the weathers cold it brings us down
its seasonal
but why do I feel it in summer or all the time.
