Life Is Beautiful

Vega 4

Life is beautiful We love until we dieWhen you run into my arms We steal a perfect moment Let the monsters see you smile Let them see you smilingDo I hold you too tightly? When will the hurt kick in?Life is beautiful But it's complicated, we barely make it We don't need to understand There are miracles, miracles Yeah, life is beautiful Our hearts, they beat and breakWhen you run away from harm Will you run back into my arms Like you did when you were young? Will you come back to me? I will hold you tightly When the hurting kicks inLife is beautiful But it's complicated, we barely make it We don't need to understand There are miracles, miraclesStand where you are We let all these moments pass us by It's amazing where I'm standing There's a lot that we can give It's just ours just for a moment There's a lot that we can give It's amazing where I'm standing There's a lot that we can give It's just ours just for a moment There's a lot that we can give
