Living Witness

Dry Kill Logic

Preaching fear of future disaster
As I wonder what you truly know
watching as your dynasty crumbles
Never needing anything at all
Never needing justification
Descending darkness takes away the light
Fading further than all had expected
Sinking as I feel I am insideSeize everything and go
It's not that having but the want
Now the move is just to
Is all that you know
Seize everything and go
Its not the having but the want is all that you know
You know?
Bringing chaos with all that's uncertainThis boat of lies will surely start to sink
Under the weight of such oppression
Missing out on what I feel is right
Casualties almost too much to take
Living proof and bearing witness
Looking for a sign of life is all
No more hope and no more passionIt's not that having but the want
Seize everything and go
Now the move is just to
Is all that you know
Seize everything and go
You know?
Its not the having but the want is all that you knowHere I lie
Know (x4)
More than need
Alone inside
More fuel for greed
Move just toSeize everything and go
It's not that having but the want
Is all that you know
Now the move is just to
Its not the having but the want is all that you know
Seize everything and go
Seize everything and go
Is all that you know

Now the move is just to
It's not that having but the want
Its not the having but the want is all that you knowSeize everything and go
