

# I Wanna Be Your Light

Heather Nova

Nothing's promised in this life  
So I'm thankful that we're here tonight  
Take my hand and let's look up, at the stars  
We can make them ours I wanna be your light  
Let me be your light  
I'll light your way across the Milky Way  
I wanna be your star  
Let me be your star  
I'll light your way across the Milky Way An' I don't wanna see you cry  
All that pain you hold inside  
'Cause life is waitin', don't forget  
You are free, I'll help you see I wanna be your light  
Let me be your light  
I'll light your way across the Milky Way  
I wanna be your star  
Let me be your star  
I'll light your way across the Milky Way Where you go? There's no time in life to judge  
Only time enough for love  
So as another night slips by  
Let us dance beneath the sky I wanna be your light  
Let me be your light  
I'll light your way across the Milky Way  
I wanna be your star  
Let me be your star  
I'll light your way across the Milky Way I wanna be your light  
Let me be your light  
I'll light your way across the Milky Way  
The Milky Way
