

# All This Love

## Angus & Julia Stone

You find a way there and I will never ask  
I will follow you  
I will follow you  
You be the night sky and I will be the stars  
I will follow you  
I will follow you There's all this love if you need it  
There's all this love if you need it  
There's all this love if you need it  
There's all this love if you need it now You take the high road and I will come along  
I will follow you  
I will follow you  
Bring me the ocean and I will bring you song  
I will follow you  
I will follow you There's all this love if you need it  
There's all this love if you need it  
There's all this love if you need it  
There's all this love if you need it now All of me is all for you  
You're all I see  
All of me is all for you  
You're all I need There's all this love if you need it  
There's all this love if you need it  
There's all this love if you need it  
There's all this love if you need it now
