

Faux Suede Drifter

[Goldfrapp](#)

Wake up wanting but don't know what
Night rider waiting
How can you still be on my mind?
The truth is overrated tooSomething about the way you held me tonight
Something about the way you kiss
No one can be blamed
We're the light arrived
Something we can't heal this timeFaux suede drifter, you never moved
Silence eroded
Touching you with a loaded gun
The eyes follow eyes and assume
