

Speak to Me Gently

Future of Forestry

Sadness and rhyme, these are the times
These are the memories
And we find a way, pushing through the day
So speak to me gently Can you just feel the time
Falling from some place new?
And can you just feel the sign?
Love waits for you, love waits for you I'm searching the stars in desperate hours
Bound to find meaning
And God shows a face in this desolate place
And tenderness meets me And can you just feel the time
Falling from some place new?
Can you just feel the sign?
Love waits for you, love waits for you Stories untold, of redwoods grown old
Reside in the forest
And there you can hear a whispering tear
That speaks into our loneliness Can you just feel the time
Falling from some place new?
Can you just feel the sign?
Love waits for you Can you just feel the time
Falling from some place new?
Can you just feel the sign?
Love waits for you, love waits for you
