Night Came

Kathryn Williams

Night came to me
Like a tired movie star
Crept up to me in the dark
I heard it callYou're too tired to listen to me
But you'll miss me
If you sleep
And what's a day
Without a night
To give it birthLie below
Watch it rise
What is worse
I need her like
She needs me
How can you say
The night is freeYou cursed me cause i stole the light
But i helped the blind
Took everybody's sight
Then they bought the light from the day
Now there's not a safe place
