

Glass House

Mads Langer

Heat heat elevation
Cold by the atmosphere
We've come too far now.
Back to watch the surface at the frequencies of visible eye.
No turning back, no mercy. We're jumping out in parachutes
Watch yourselves from the birds view
Protecting us against the fall
when we are ahead by the canon ball.
We shoot it up the glass house
We go it all up, we have no fear,
We shoot it up the glass house
We'll be gone when the smoke is disappeared.
We shoot it up the glass house
We go it all up, we have no fear,
We shoot it up the glass house. Fire storm horizon
Will burn and in fusil fields
Warm and isolation
We step the air float
We want each fellow in this feed .
slow motion melting heart beat.
We're jumping out in parachutes
Watch yourselves from the birds view
Protecting us against the fall
when we are ahead by the canon ball. We're jumping out in parachutes
Watch yourselves from the birds view
We're living in the glass house.
