We're Both Confused

Luna

Things I did haunt me still
Follow me around
Like they know the wayThings she said linger on
Hanging in the air
And they will not go awayI thought I knew her game
I miss her just the sameThought I knew what to do
She broke my window pane
But she said I couldn't proveI look at my dog, we're both confused
I love September best
And I feel like I should moveI thought I knew her game
I miss her just the same
