

# We're Both Confused

Luna

Things I did haunt me still  
Follow me around  
Like they know the way Things she said linger on  
Hanging in the air  
And they will not go away I thought I knew her game  
I miss her just the same Thought I knew what to do  
She broke my window pane  
But she said I couldn't prove I look at my dog, we're both confused  
I love September best  
And I feel like I should move I thought I knew her game  
I miss her just the same
