Brasil

Elefant

I saw her standing there Red fire in her hair She knows I can't resist

The poison from her lipsI never wanted it, I tried to run from it Temptation stares me downShe sings when she is sad

She laughs when she is mad

The lonely heart club cry

I hear them through the nightI never wanted it, I tried to run from it Temptation wears me downHeaven can wait

Heaven can wait for me now

Leave open the gate

Hell is the game I want now, I'm coming downShe leaves me wanting more

White flowers on the shore

She knows I can't resist

The poison from her lips

The poison from her lips

She knows I can't resist
