

Applied Science

311

Nod your head to this, as a lot of apprentice
Some of this were standing on the shoulder of giants
Some tyrants some benevolent
To the followers it's relevant
The rest get bent on lending opinions
I'm sending to a brand new level, I revel in completion
I'd like to see deletion of the parasite to make it go right
Fools know rules but the rest keep bouncing back
With the lack of further adieu see as one can deduce
We kick out the champs slam the shit out hard and long
'Cuz we got more song
Something you might like now all star bound, yeah
You're so sound cool as the blue water all around
From a force field flashing somebody is sending
Black evolutions of [Incomprehensible] you are hearing
The dark supernatural is the world we call our own home
Lightning in the mind [Incomprehensible]
But we're wild they say never trust us we're shady
In lieu of the crew you're into we are baby
'Cuz music will becoming out the words we speak
We erect break beats, shatter wax still on the platter
Our shit is badder we come and then we scatter
'Cuz we deep and we solid yeah, we hear ya holler

Electricity running through the soul it feels good
Some time the only thing that really ever could
Feed that hunger I crave it, I love it, I gave it
I shove it in the battery and save it for later
A waiter in the Dorothy Pavilion in '89
I met some weirdos and had myself a real good time
Downtown L.A. is a soul graveyard
Where you got to be hard or get jacked
It lacked a certain sense of something
Something basic [Incomprehensible] in the least I broke east
You know I had to face it I guess, I flaked but it was no mistake
Because 311's got the boom y'all
My mic check is giving me electric company
I can't see the high wide sky or stars above me
Are you a flower or more like a high rise tower

If so the soul of sweet delight on you will shower
There's a place for us they say is somewhere
Not a dream but a place and you will be there
Your slippin' but content because your spirit
And hills are alive with the sound of music
People never see the whole trip of life, man
Grab knowledge and all you do is siph
