

# Dragon Star

## Manilla Road

Night sky turned into fire  
Like Saxon funeral pyres  
Melting away the ice  
With heat from solar light To William and his horde  
This omen was The Word  
Victorius he would be  
Against all Saxony Through solar winds  
The comet lives  
Bringer of war  
Torch of The Gods  
The Dragon Star Throughout our destiny  
This star has been the key  
To wars both lost and won  
And birth of Christendom Too late we find the truth  
That's lost within our youth  
The way of Gods and men  
Have strayed apart again Alexander  
Born of The Star  
Mortal of God  
Who cut the Gordian Knot Bring back the faith  
It's not too late  
To turn the tides  
From genocide A message from The Gods  
The Cycle carries on  
Life passes to be born  
In yet a higher form This is the way of life  
As day must turn to night  
The Star shall fade away  
As we must all one day
