

Big Sky

[Rachel Loy](#)

I talk to you every night, and you make me feel so right, but there's a problem here even though you make me feel so dear, I'm with someone else in another world another place without you, Just wait for me I'll be there soon, wait for me just wait 'till noon, I'll make it painless but there will still be pain I'll make it breathless but there will still be breath I'll make it speechless but people will still talk face it, it will be hard!
