

Hold Me Now

Elastica

1, 2, 3, 4 Don't stop shaking, it's my head
That makes me wanna second guess at a distance
Hoping there's a method to your madness, baby
I might just understand if you obey me Hold me now, I need assistance
I'd take somebody else, if I could Walking in the tree-lined place so pensive in the country
I can't take the voodoo that you do
Just lust easier sussed real love makes me untrue
It's hard to make a stew when the meat keeps looking up at you And hold me now, I need assistance
Follow down the path of least resistance
Hold me now, don't keep your distance
I'd take somebody else, if I could Hold me now, I need assistance
Follow down the path of least resistance
Hold me now, do I need a license to hold you? Hold me now, I need assistance
Follow down the path of least resistance
Hold me now, will it take a lifetime to hold you?
