

# Papillon

## Radar Bros.

Hello weak butterfly in my arms  
You traveled so far to die in my arms

School's out today, and the spring air is still  
You move like a riverboat through the thick, brushy hills  
Timed like a lung  
You expand  
You deflate

In the hot night  
Crows fight beetles in the firelight

Hello weak waterfall in my arms  
You traveled so long to die in my arms

You land in the river  
But the river is a river  
No more like an overturned ferry  
You sink to the floor  
You're an apple in the weeds  
You're a glowing green eye

School's out today, and the fires won't go out  
I'd love to come over, but the wind's blowing south  
But while we've been sleeping, the bushes are burning
