## **Start The Show**

## **Lights from Space**

Start the show Running down the alleyway, stepping on the hearsay No stopping what you can't stop, they tell me The push comes to shove, yeah You don't need a watch to know what time it is Don't need a plan, we can fall into it Just, ah, like a domino, here we go We can roll, rock and soul You know what time it is to start the show Build a fire, watch it grow You know what time it is to start the show Driving on the interstate, licking off a silver plate Swinging like a heavy weight, I am free Now we can roll with the show Yeah, you live fast, you die alone, now break the mold We don't need a plan, we can fall into it Just, ah, like a domino, here we go We can roll, rock and soul You know what time it is to start the show Build a fire, watch it grow One, two, three, now baby start the show We can roll, rock and soul You know what time it is to start the show Ladies and gentlemen, we're ready to go You know what time it is, start the show
