My Gun Is Broken

MU330

My gun is my gun is broken [x2]
It won't cock and it wont shoot my gun is broken
What do you figure I pulled on the trigger but
My gun is my guns is broken
This place is not so harmless three days
and I've gone hopeless doubting everything around me
all my friends are out to get me, you appeared so softly
innocently swallowed me diving deep into the blue
far from oxygen and you doubting everything around
me all my friends are out to get me
My gun is my gun is broke,
Useless words had no effect I'm spent I've got nothing left, dropped the ball in your
Backcourt, I feel like time is getting short
Doubting everything around me all my friends
Are out to get me
My gun is broken
