Mansion World

Deadsy

Once upon, and once up high a dandy dream, what means to die?
Things to come, as life goes by the core of human equation
Pentagram present the sign a sign to save your eyes
Turn around, I'd like to know youEverywhere and every why the answer lay beyond the sky
Pass through the seven satellites pass on to the place we go to
Learn to read, to rhyme, to count your primes an earthly education
Climb a tree in life in hopes to find the mid-space time dilationOn a mansion world, the role's reversed
A slave becomes a master
On a mansion world, the soul's converse
And life moves a little faster
But we unify in universe to arrive in the ever after
In the mansion world, I might like to know youNow and then it comes to mind I draw upon a long lost time
So don't ask me why the angels won't cry
'Cause you know what I've already told you
Memories of Urantia girls they race around my brain in swirlsYou never ask me why the change is in the sky
Bring you up which to the hole that you go through
And now you're off you've done the time prepare for divine invasion
As the spirit climbs Morontia minds ascend to the cosmic nationOn a mansion world, the role's reversed
A slave becomes a master
On a mansion world, the soul's converse
And life moves a little faster
We unify in universe to arrive in the ever after
In the mansion world, I might like to know you
New Urantia girl, everything's below youOn a mansion world, the role's reversed
A slave becomes a master
On a mansion world, the soul's converse
And life moves a little faster
We unify in universe to arrive in the ever after
In the mansion world, I might like to know youOnce upon, and once up high
A dandy dream, what means to die?
