

# Lady Stardust

Michel, Danny

People stared at the makeup on his face  
Laughed at his long black hair, his animal grace  
    The boy in the bright blue jeans  
    Jumped up on the stage  
    And lady stardust sang his songs  
        Of darkness and disgrace  
    And he was alright, the band was all together  
    Yes he was alright, the song went on forever  
        He was awful nice  
    Really quite out of sight, he sang all night long  
        Femme fatals emerged from shadows  
            To watch this creature fair  
        Boys stood upon their chairs  
            To make their point of view  
    I smiled sadly for a love I could not obey

    Lady stardust sang his songs  
        Of darkness and dismay  
    And he was alright, the band was all together  
    Yes he was alright, the song went on forever  
        And he was awful nice  
    Really quite out of sight and he sang all night, all night long  
        Ooh how I sighed when they asked if I knew his name  
        Though he was alright, the song went on forever  
        Yes he was alright a song went on together  
            Yes he sang awful nice  
    Really quite paradise, he sang all night, all night long  
        Long song
