

# Anywhere

## Interpol

We tried to invade  
But some of us in each  
At least try hold the other  
In the right light Uh, this sky is gonna break  
Some of us dies heroes  
At least they'll never suffer  
At least they're always free The ocean, I could go anywhere  
I could go anywhere  
So free, my place in the sun,  
I could go anywhere  
You know all about me  
That's what's so frightening  
You know all about me  
It seems like you're always traveling We tried to engage  
Softened up by piece  
At least I have my taste  
Of the nightlife Be kind to the base  
Some day you might need them  
At least they'll never suffer  
At least they're always free The ocean, I could go anywhere  
I could go anywhere  
So free, it's my nature to want  
I could go anywhere  
You know all about me  
That's what's so frightening  
You know all about me  
It seems like you're always traveling You know all about me  
I won't be tying hard to leave  
I should tie you up  
It seems like you're always traveling  
Always The ocean, I could go anywhere  
At least that's my only cure  
So free, my face in the sun,  
I could go anywhere
