

# Love Will Come Someday

**David Sanborn**

(Music By David Sanborn and Vocals by Michael Sembello)

Funny how the legends die  
When heroes never come alive  
In the day time

Funny we can be sad  
It doesn't have to be so bad  
In the night time  
You want to know, Where they  
The songs all go in your life time  
One of these we'll go and find out where they stay.

Once upon a lover's song  
There was a boy who sang along  
In the night time  
Once upon a lover's dream  
There was a tale of broken wings in the day time  
You want to know, where they, the song all go in your life time  
One of these days we'll go and find out where they stay.

Love will come some day  
Love will find a way  
Love will come some day  
Love will find a way

The songs that I sing, the songs that I bring mmmm

Catch a piece falling star  
Try to keep in a jar till the morning  
Catch a summer firefly  
Willing it'll stay alive till the morning

You want to know where did the songs all go  
In your life time

One of these days we'll go and find out where they stay.

Love will come some day  
Love will find a way

Love will come some day

Love will find a way

The songs that I sing, the songs that I bring

The songs that I sing, the songs that I bring

The songs that I sing, the songs that I bring, yeah yeah

Love will come some day

Love will find a way

Love will come some day

Love will find a way

---
