

Elephant Star

Candlemass

Drifting from the prison planet
I fell into the 13th sun
Way beyond all super science known
Surfing through space and mantraGod of time and mercury
Our love will live inside the elephant star
They took me to the titan mother
A dream away from yesterdayTomorrows world I slip into today
Centuries in firelight
I die with every winter star
Our love will live inside the elephant starParalyzed and hypnotized
The big dog in the sky
Mystified, majestified I fly
I hide behind the silver fallos
