Wide Eyes

Hayden

Oh, some evil spirit, oh, some evil this way comes
They told me how they fear it
Now they're placing it on their tonguesFor to see it with my own eyes
For to see it with my own eyesNo food or water for the better part of ten months
Quietly he sat between the folds of a tree trunkFor to see it with my own eyes
For to see it with my own eyesAll the men of faith and men of science had their questions
Could it ever be on Earth as it is in Heaven?For to see it with my own eyes
For to see it with my own eyes
