

Little Fist

Love Spit Love

I've got lipstick on my front teeth
I'm full of pills but I don't feel good yet
Tied up running out of good luck
Eyeliner tears are running down my neck
Make up, chewing gum and hair spray
I know tomorrow's gonna taste like this
Wrap the world up in a suitcase
And there's a million wanna shake my fist
There's a world in front of me
I know tomorrow's gonna taste like cake
There's easy money for the freaks
A million friends that don't know what my name is
I could be flavor of the weekend
I smell like roses and I taste like cake
Wake up sleeping on the pavement
Everybody needs a friend down there
I don't really wanna leave
I know tomorrow's gonna taste like cake
There's easy money for the freaks
There's television on but who cares anyway?
There's a world in front of me
I know tomorrow's gonna taste like cake
There's easy money for the freaks
A million friends that don't know what my name is
I don't really wanna leave
I know tomorrow's gonna taste like cake
There's easy money for the freaks
There's television on but who cares anyway?
