

Sacred Reich

A vision of unselfishness, a union of black and white
One nation of all races, it's clear within my sight
I see it clear, no hate, no fear, no soldiers sent to die

We'll not feed the war machines that lead our youth to death

As the world around crumbles, opposing armies march

And you must be the convert who works towards world peaceMuthafuckers around us who stand and say no way

Opposing lessened armies, they say are here to stay

But no one knows until we try, what we all can do

I won't watch children die, it's up to me and you
Our world is divided, the boundaries have been drawn

Ideas are decided by where you have been born

You can't judge people by the government of their land

They're flesh and blood like us - why don't you understand?The future is our burden, we can't stand and watch

As the world around crumbles, opposing armies march

We work towards our goal: one nation - unity

And you must be the convert who works towards world peace
