These Ravines

Ages and Ages

These ravines were here before us
So make your case from on your patio
We'll be thorough in ignoring it allAnd it makes no difference what you say
'Cause we never listen and we're sure to be
Safe as always from your patio callsAnd it's ours to explore how we want to explore
There's a reason we're out here
But you have no use
So go back to wherever you came from before
And remember your manners 'cause someday we're sure to beAshes, ashes, everyone and whatever's left is better off in the world without us,
here to squander it allSo it makes no difference what you say to us
We don't even take you serious
Safe as always from your patio callsAnd it's ours to relate how we want to relate
There's a reason we're in it
But you have no use
So go back to whatever
You were doing before you decided to speak
And remember your manners or we'll overshadow you all
