

Maybe

Everlast

Maybe you could take a lil' piece of my pain
Maybe you can make it all feel the same
Maybe you can burn this night in my brain
Maybe you can find someone else to blame for all this painMaybeMaybe you could tell me about your worst fear
Don't say it out loud, whisper in my ear
Ain't never felt nothing like this here
Maybe you can see things a lil' more clear, dry away your tearAnd "I love you" are just three words that are
overused when we're talking
Love and friendship, situations get confusing so often
Maybe I should give this woman my name, a piece of my painMaybeMaybe we could talk about all my dreams
Watch them all come apart at the seams
Sometimes when it rains it really teams
Sometimes they cut diamonds with laser beams, whatever that meansAnd "I love you" are just three words that
are overused when we're talking
Love and friendship, situations get confusing so often
Maybe I should give this woman my time, that would be fineMaybeAnd "I love you" are just three words that
are overused when we're talking
Love and friendship, situations get confusing so often
Maybe I should give this woman my name, a piece of my painMaybe
