

# Together

Krystal Meyers

We all long to belong  
We all need to be needed  
Loneliness is our disease  
Still we bite the hand that feeds  
Where did we go wrong?  
Insecure and self-sufficient  
Building up walls instead of bridges  
Let our lonely hearts collide  
We're made to live this life together, together  
Reach across this great divide  
'Cause standing side by side is better, together  
All the pride that we defend  
Teaches us to pretend  
Like we can make it on our own  
But we were never made to walk alone

Let our lonely hearts collide  
We're made to live this life together, together  
Reach across this great divide  
'Cause standing side by side is better, together  
Let the lines between us disappear  
It starts now, it starts here, yeah  
Let our lonely hearts collide  
We're made to live this life together, together  
Reach across this great divide  
'Cause standing side by side is better, together  
Together, together, together, together, together, together  
Together, 'gether, 'gether, 'gether, 'gether, together
