The Day Brings

Brad

Hold up your end

And I'll hold up mine

Dancin' all the time

Dancin' all the time

And too late father

You know that that's for sure

You never find a way

Never find a waySo gather around

And see what the day brings

And see what makes you laugh

And see what makes you sing

And never, never mind

The thing that people say

You'll never go away

You'll never go awayWho knows where the storm will take us

Who knows when the pain will break us

When will all the G's be given?

Another chance to live in freedomHey now

Get your heart, get your heart

Off of the shelf

Make the grey sky blue

Yeah, I'm talkin' to you

And never mind

The sick and the afraid, aha

Askin' out today to see a brighter daySo gather around

And see what the day brings

And see what makes you laugh

And see what makes you sing

And never, never mind

The thing that people say

You'll never go away

You'll never go awayWho knows where the storm will take us

Who knows when the pain will break us

When will all the G's be given

Another chance to live in freedomSo gather around

And see what the day brings

And see what makes you laugh

And see what makes you sing

And never, never mind

Never mind that what the people say
You'll never go away
You'll never go awaySo gather around
And see what the day brings
See what makes you laugh
And what makes you sing
