Holy Grail

Heidi Berry

This is the way that you made it
Itâ€™s like a desert you laid it so bare
Walking again in these badlands
Follow me if you will if you dare

Look to the sky I stand under
And I suppose you might say Iâ€™ve been blessed
Breathe in the air that is burning your face
Feel the wind thatâ€™s so heavy with dust

This is the way that you wanted to be
Now abide by the rules you made
Pitch to the wind if you want
But you wont be my hope or my holy grail

Is this not what you expected
Or believe the consequence
Though you still look for the garden
In the place of this end fairy tales

You know you canâ€™t reap what has never been sown
Now forgive me but Iâ€™ve got to leave
Standing away to see its all over
So you see we have no common ground

This is the way that you wanted to be
Now abide by the rules you made
Call out my name if you want
But you wont be my hope or my holy grail
Call my name!
Call my name!

This is the sound of my hearthbeat
And the sound of the air that I breathe
Here is the mouth that I speak with
And the words that come so hard to me
These are the eyes that I look through
And their colors are grey, blue and green
These are the thoughts that burn right through my brain

Like a brand to show what I have seen

This is the way that you wanted to be
Now abide by the rules you made
Bitch to the moon if you want
But you wont be my hope or my holy grail
Call my name!
Call my name!
Call my name!
