

# Extraordinary

## Nizlopi

She draws my very depths for me  
In moments of astounding ecstasy  
Why would I stop her getting next to me  
I just love her whole heart, there's sex in me woah  
My love is collecting me  
Fields of roses and kissing me openly  
She's god, she's accepting me  
The whole field, late june, getting wet for me woah  
I love what she sweats for me  
Laughing as we melt in infinity  
Perfect elegant boobs like a da vinci  
I can't wait 'till she shows me her blackberry

Turn out the lights, switch off the telly  
We're making love extraordinary  
Switch off our phones, roll closer to me  
We can make life extraordinary

Turn out the lights, switch off the telly  
We're making love extraordinary  
Switch off our phones, roll closer to me  
We can make life, we can make life

God knows, but she gets to me  
I'm colonel mustard with a.....  
Laughter and laughter, no destiny

.....

You know I'm just glad to be singing  
Because yesterday  
I was as blue as George Galloway investing in  
The false hope of my ego I'm not nesting in  
My heart's festivity, this song that you're giving me  
In a light will set you free from false captivity  
Wake up your heart to being, a voice that is singing  
What you and me could be in love

Turn out the lights, switch off the telly  
We're making love extraordinary  
Switch off our phones, roll closer to me

We can make life extraordinary

Turn out the lights, switch off the telly  
We're making love extraordinary  
Switch off our phones, roll closer to me  
We can make life extraordinary

You and me can open up our hearts  
Just by being by ourselves my love  
hey oww  
And you and me can overcome the pain  
Just by feeling..... tonight

Turn out the lights, switch off the telly  
We're making love extraordinary  
Switch off our phones, roll closer to me  
We can make life extraordinary

Turn out the lights, switch off the telly  
We're making love extraordinary  
Switch off our phones, roll closer to me  
We can make life, we can make life extraordinary
