

In Silence

Play Dead

Silent words for eleven years
Final words become our fears
Watch the man hold the bottle high
Watch his life go running by and by In silence The clicking camera misses a frame
The fall of wonders never seen again
his battle scarred face tells it all
society's outcast stripped of life's reward In Silence Watch the fall watch them cry
Watch the old man wake up and die - die Pendants paid with our loose change
Conscience clean - no more chains
Daunting stare shows the pain
But no one caring to ever look again
In Silence
