

# Roses (feat. Georgia Anne Muldrow)

## Mos Def

When I'm down I just draw some roses  
On a pretty piece of paper with my recipe alone  
So halfway through I feel so much better  
I imagine happiness and it runs right to me, such amazing beauty You don't have to cut up no roses  
Please just leave them living  
Got my pencil, got pretty paper  
Please don't worry, we're forgiven I have found, just the perfect feelin'  
Finally 'cause I'm grateful, I can feel your spirit comin' closer on me  
It is grand just to be reminded, reminded of the good things  
And living in a new day that no one can tear down You don't have to cut up no roses  
Please just leave them living  
Got my pencil, got pretty paper  
Please don't worry, we're forgiven Power and grace, yellow for friendship, red for love  
Black for the universal stars above  
Pink buds that I bought her on Valentine  
She said it was forever then she changed her mind I said a little prayer then I cleared my eyes  
[Incomprehensible]  
Started off with a oget, natural poget  
I ain't Picasso but that ain't important Faith, smart dude never graduated high school  
Stay tuned, I'm a show you how my art move  
Shape and dimension flow and extension  
Symmetry shade, blowin' out the frame Sign off my name, Dante when I'm finished  
Put it to your memory for permanent exhibit  
Love, hard work and it's worth every minute  
Abstract is still life, real life kinetic Got my pencil, got pretty paper  
Please don't worry, we're forgiven  
You don't have to cut up no roses  
Please just leave them living When I'm down I just draw some roses  
On a pretty piece of paper with my recipe alone  
So almost through I feel so much better  
I imagine happiness and it ran right to me, such amazing beauty Got my pencil, got pretty paper  
Please don't worry, we're forgiven  
You don't have to cut up no roses  
Please just leave them living
