

Speed (Can You Feel It) [Jan Driver Remix]

Azzido Da Bass

In the beginning we had light
And we walked the Earth from sunrise into the night
and we swam across the rivers and the seas
Yes we always had a need for speed

In the beginning we had trust, to go faster so a caveman took a rock
And one day he went and carved himself a wheel
Yes we always had a need for speed

To go faster, to go longer, to saw higher, to grow stronger (x3)

Yes oh yes
Yes we always had a need for speed

Can you feel it?

In the beginning we made sounds
and we talked through our heads and our minds
But now we talk to all these technical machines
Yes we always had a need for speed

Can you feel it?
Like I feel it?
(x4)

I can't keep up, moving too fast.. (x7)
I can't keep up, moving too fast, fast, fast, fast...
