minus

9GOATS BLACK OUT

Drug me, infiltrate my never land
Like the flood tide drowning the shore
Drug me, you're all over me
You watch my blood begin to boil
I love that lullaby start me up again
Electric spine, open mind
I leave you, negative behind
Watch me all in flames on a butterfly I ride
Inhale the light, relax for some time
The world outside stays numb tonight
Free your mind, express the forgotten
The world inside is yours tonight
Please me, deliver the insane
In the chaos I find peace
Please me, remind the Gods of my name
I believe there is one seat left for me

I love that lullaby start me up again
Electric spine, open mind
I leave you, negative behind
Watch me all in flames on a butterfly I ride
Inhale the light, relax for some time
The world outside stays numb tonight
Free your mind, express the forgotten
The world inside is yours tonight
I leave you, negative behind
Watch me all in flames on a butterfly I ride
Inhale the light, relax for some time
The world outside stays numb tonight
Free your mind, express the forgotten
The world inside is yours tonight
