

Falling For

I Hate This Place

We're stop motion animated
Our colors blurred and lines faded
And now we see only black and white
Come on gotta get through the night

We star in these minor catastrophes
Ones where the past keeps on creeping up on me
Your eyes are sad but you're still all right
Come on gotta get through the night

Cuz I'm still here waiting for
Something else something more
Someone to break this fall
Cuz I'm falling for you

And somehow the points align
Somehow the timing's right
Somehow I'm here falling for you

I'm here falling for you

We edit through all the bad bits
Awkwardness cut from the negatives
But all that's left just doesn't feel right
Come on gotta get through the night

We live only for these moments
To compensate for all of our time spent
So soon they're gone
They just pass us by
Come on gotta get through the night

Still everything you do
Is something real something new
Somehow you feel it all and
I'm falling you

It's not like we thought it'd be
It's not what we thought we'd see
Still here I am

Falling for you

I'm here falling for you
I'm here falling for you

Cuz I'm still here waiting for
Something else something more
Someone to break this fall
Cuz I'm falling for you

And somehow the points align
Somehow the timing's right
Somehow I'm here falling for you

I'm here falling for you
I'm here falling for you
