Going Down in Flames

Corrected Visionaries

Everything was easy
You were queen of who's who
Then some guy took your heart
And he broke it in twoStupid little girl
Thinking you couldn't fall
When you finally lost
Girl, you lost it allYou're going down in flames (no doubt)
You're going down in flames (bail out)
You're going down in flames (you can't fly)
You're going down in flames (bye-bye)There you were shining
Like a star in the night
Then the bottom dropped out
And you ran out of lightPretty little girl
Overcome by desire
Now you're falling through time
Like a hot ball of fireYou're going down in flames (no doubt)
You're going down in flames (bail out)
You're going down in flames (you can't fly)
You're going down in flames (bye-bye)Well you shot to the top like a bottle rocket
Thinking that you had the world in your pocket
Maybe you flew too fast, too far
Now you're coming down like a falling starYou're going down in flames (no doubt)
You're going down in flames (bail out)
You're going down in flames (you can't fly)
You're going down in flames (bye-bye)
