All Friends and Kingdom Come

Monster Magnet

Enter now the lions den
It's long past due that we begin
I have longed for you afar

Love sacriface in my backyardI had seen beyond my gaze

And I have gazed beyond today

And their lust shall build a world

Is what the prophets have to sayIn this world where I am king

The atoms roar and strange love sings

All the jewels that one can bring

Mutant rags and big TVService now, the mushroom boy

Come to me now, by my side

And if you don't want to play

Then I'm afraid, you'll have to cry'Cause I can fry you with my eyes
I can blow you to kingdom come

I can take all the friends awayI've got mushroom clouds in my hands And a place in my head for you

Better come to the throne todayThere's a line inside my head

I dance at night before bed

But I never took the ride

To the silo shed, on the other sideService now, the mushroom boy

Or at lest come to a show

Just one lick upon my thoughts

Or both our worlds will have to go'Cause I can fry you with my eyes
I can blow you to kingdom come

I can take all the friends awayI've got mushroom clouds in my hands

And a place in my head for you

Better come to the throne todayI'm just not quite right today

I'm just not quite right today

I'm just not quite right today
