Meet Me At My Window

Jack's Mannequin

Meet me at my window
At my window
I could use a hero right now
You could use someone to save
Someone like me
Someone who's not brave
Someone who's not free
Meet me at my window
With the darkness, cometing down
I could use your, saving now
Meet me at my window
Meet me at my window
I will wait for you there
I will talk to you, no
When there's no one, around
Come on, you could change me
You could steal me
You could turn all the lights on
And show me the real me
Then maybe, if I'm lucky
You'll offer me protection
You could even heal me
Just meet me at my window

With the darkness, cometing down
I could use your, saving now
Meet me at my window
Meet me at my window
I will wait for you there
I will talk to you, no
When there's no one, around
So meet me at my
Meet me at my window
At my window
Meet me at my window
My window, right now
With the darkness, cometing down
I could use your, saving now
Meet me at my window

Meet me at my window
I will wait for you there
I will talk to you, no
When there's no one, no one around
When there's no one, no one around
When there's no one, no one
When there's no one, around
