Hey Now What You Doing

New Order

Hey now, what you doing?
Don't go down the road to ruin
Look back at where you came from
Count to ten before you go wrong
You have the brightest future
Writing songs on your computer
But you couldn't walk the extra mile
And now your life is running wild
You've gotta hold your head up high
You know it's not too late to try
You've gotta lift that heavy load
You've gotta get back in control
The things you've said to me
What is it that your eyes see?
Is it love or is it hate?
Banging on an open gate
Hey now, who's that with you?
What's that thing I saw him give you?
Turn around, don't come no closer
You took it from my shoulder, holster
You've gotta hold your head up high
You know it's not too late to try
You've gotta lift that heavy load
You've gotta get back in control
You've gotta hold your head up high
You know it's not too late to try
You've gotta lift that heavy load
You've gotta get back in control
Why don't you put that gun right down?
Before you kill the love you found
Hey now, what you doing?
Don't go down the road to ruin
