

I Never (Album Version)

[Rilo Kiley](#)

I'm only a woman
Of flesh and bone
And I weigh too much
We all do
I thought I might die alone But I had never, never, never, never, never, never, never, never, never, never
met you
So baby be good to me
I got nothing to give you, you see
Except everything, everything, everything, everything
All the good and the bad 'Cause I've been bad
I've lied, cheated, and stolen and been ungrateful for what I've have
And I'm afraid habits rule my waking life
And I'm scared and I'm running in my sleep for you but all of the oceans and rivers and showers should wash it
all away and make me new for you 'Cause I never, never, never, never, never, never, never, never, never, never,
never, never, never, never, never met you So let's take a loan and I'll put it down on a house in
A place we've never lived
In a place that exist in the pages of scripts and the songs that they sing
And all of the beautiful things that make you weep but don't have to make you weep 'Cause I never, never,
never, never, never, never, never, never, never, never, never, never, never, never, never, never, never,
never, never, never, never, never, never, never, never, loved somebody the way I loved you
