

Hypnotized

Pillar

It's been far too long, we've known all along
This was going on, can't seem to respond to anything
So we carry on with our lives, we rewind
We can't find, we deny The simple fact that we haven't done anything
Doesn't mean that we can't start offering
Why do we feel so far? It's like we're seeing stars
Why does it seem so hard to wake up now
And see who we really are? So, let go
Don't follow Where do we go from here?
How did it disappear?
It's hard to see with our own eyes
These times, we've been hypnotized Where do we go from here?
How did it disappear?
It's hard to see with our own eyes
These lines, we've been hypnotized Well I think it's time we try to open up our eyes
Look away from the very thing that's made us cry
We're hypnotized and you'll see the real me luckily
It can't be stopped
If the tick-tock of life isn't all that you got
So, come ready or not wake up, it's your last shot So, come to
And redo Where do we go from here?
How did it disappear?
It's hard to see with our own eyes
These times, we've been hypnotized Where do we go from here?
How did it disappear?
It's hard to see with our own eyes
These lines, we've been hypnotized Wake up now, wake up now
So, wake up now, wake up now So, wake up now it's been far too long
How can we not go wrong?
Now, it's been far too long
How can we not go wrong again? Where do we go from here?
How did it disappear?
It's hard to see with our own eyes
These times, we've been hypnotized Where do we go from here?
How did it disappear?
It's hard to see with our own eyes
These lines, we've been hypnotized Where do we go from here?
How did it disappear?
Where do we go from here?

We've been hypnotized Where do we go from here?
How did it disappear?
It's hard to see with our own eyes
These lines, we've been hypnotized
