Part Of The World

Oddisee

My feet touch down
In a border town
No one knows me here
My long distance fears
Have long dissapeared
Only a clear horizonBorn optimistic
The old familiar feeling
Like a stone, overgrown
I am, part of the world
Feel the sun, feel the rain
I am, part of the worldAmerica a miracle
Those roads saved my soul
They kept my mouth talking
They kept my spirit
Walking
No one could stop this nowBorn optimistic
The old familiar feeling
Like a stone, overgrown
I am, part of the world
Feel the sun, feel the rain
I am, part of the worldWhere will I go
The time that the lights low
I'll drift through the air
Become part of the horizon
And stay part of the world
Just stay part of the world
Just stay part of the world
