Can't Say Goodbye

[Bobby Caldwell](#)

Ever since the day we met
I knew that I would not regret
I could never leave you for anotherBut you treat me like a fool
I can't keep on being cool
Now I need some time just to recoverWith a ticket to a distant place
I could leave you far behind
Your love has put me into outer space
I'm about to lose my mindThere are things about you
I will never understand
And although our love
Is not exactly what I plannedIt was meant to be
Darling, can't you see?
You and I, just can't say goodbye
Till the day I die, I will love youYou and I, just can't say goodbye
Till the day I die, I will love youMaybe it would be worthwhile
If I could make you change your style
But honey, you would never have that notionYou would have to rearrange
The things that you would never change
Tell me why you play with my emotions?If you see confusion on my face
Well, it's just my state of mindYou and I, just can't say goodbye
Till the day I die, I will love you
You and I, just can't say goodbye
Till the day I die, I will love youOh, Lord, you and I, just can't say goodbye
Till the day I die, I will love you
You and I, just can't say goodbye
Till the day I die, I will love youYou and I, just can't say goodbye
Till the day I die, I will love you
You and I, just can't say goodbyeYour love has put me into outer space
I'm about to lose my mindYou and I, just can't say goodbye
Till the day I die, I will love you
You and I, just can't say goodbye
Till the day I die, I will love you
