Come Together

Joi Cardwell

We walk down this road
Just us together
Wont let any obstacles
Block our way
With everyday comes another chapter
And in my mind this
Is how well stayWhen we come together
All the outside world disappears
When we come together
Im at peace with all my fears
Cause tomorrows not a proven place
And seasons turn to years
For now and forever
All the outside disappears
When we come togetherThe moments we share
Will last forever
When Im in your arms
Is my favorite place
Happily well be ever after
The night is young no time to wasteWhen we come together
All the outside world disappears
When we come together
Im at peace with all my fears
Cause tomorrows not a proven place
And seasons turn to years
For now and forever
All the outside disappears
When we come together
