

No Generation

The Downtown Fiction

When the sun goes down
And the freaks come out
And I'm waiting in this messed up town
Hesitating, is it too late now?
Well this ones for the broken-hearted
Red lights on an empty street
Thinking tonight, it's just you and me
And we just might make some history
Well, shut up and let's get it started
Now we're gonna live it up
'Cause we don't gotta know anyone
To have some fun
There's no generation like our generation now
Gutted when the sun comes up
'Cause you make me wanna fall in love
Or take some drugs
There's no generation like our generation now
Well we talk 'bout now and we're all strung out
Going crazy in this fucked up town
And I'm hazy, yeah I'm coming down
And believe me I'm just getting started
Listen, let the music play
While we're kissing, every night away
And we're wishing it'll stay this way
This one's for our dear departed
Now we're gonna live it up
'Cause we don't gotta know anyone
To have some fun
There's no generation like our generation now
Gutted when the sun comes up
'Cause you make me wanna fall in love
Or take some drugs
There's no generation like our generation now
No generation like our generation
There's no generation like our generation
There's no generation like our generation
Now we're gonna live it up
'Cause we don't gotta know anyone
To have some fun
There's no generation like our generation now
Gutted when the sun comes up
'Cause you make me wanna fall in love
Or take some drugs
There's no generation like our generation now
(woah) Like our generation
(woah) Like our generation
(woah) Like our generation
There's no generation like our generation now
(woah) Like our generation

There's no generation like our generation
There's no generation like our generation
There's no generation like our generation now
